

# 2nd Street Streetscape Project

## 2nd Street Project Moves Forward

The 2nd Street Streetscape Project area spans from Delaware Street to Holmes Street and focuses on seamlessly incorporating a functional corridor that is pedestrian accessible and aesthetically engaging. The project is currently in the preliminary design phase, with technical work remaining to be completed.

Structural and architectural design ideas presented in the Preliminary Design Phase include:

- Proposed roadway and sidewalk dimensions that give priority to pedestrian access, but also provide vehicular access
- An architectural element that could serve as a wayfinder or meeting point, with visibility from 5th Street, through the City Market and to 2nd Street
- Various parking options, including parallel and angled parking
- The addition of design elements to the existing sub-station that would be incorporated seamlessly with other design features
- The development of pedestrian plazas, particularly at intersections along 2nd Street where there would be limited vehicular traffic
- An interpretive tower that would incorporate historical photos and signage about the history of Kansas City and the River Market area
- The inclusion of public amenities, such as bike racks and park benches, in the overall design plan

## Progress

The 2nd Street Streetscape Project team is in the process of planning and preparing information and design for:

- Roadway improvements
- Sidewalks
- Trail connections
- Lighting
- Landscaping
- New storm sewers
- Sanitary sewers
- Water mains

## What's Your Vision?

Look for announcements regarding opportunities to attend public meetings in Fall 2006 and share your ideas and visions for the 2nd Street Streetscape. In the meantime, visit the Public Access Link (PAL) at [www.kcmo.org/cimo](http://www.kcmo.org/cimo) to track the progress of the project. Enter project number 64005007 in the Project Number search field.

## Project Timeline

### Task 1 - Preliminary Design (Spring/Summer 2006)

Task I has been largely dependent on public interaction. Public comments and feedback have been woven by the design team into the proposed improvements along the 2nd Street Corridor.

### Task 2 - Design Development (Summer/Fall 2006)

Task II of the 2nd Street Streetscape Project is in the process of design development. This phase includes coordination with all affected utilities and agencies and development of a streetscape language for the corridor.

### Task 3 - Final Plan Documents (Fall/Winter 2006)

Task III will consist of finalizing plan documents, cost estimates and another public meeting for feedback purposes.

### Anticipated Bid Date for Construction (Spring 2007)

### Anticipated Project Completion (Fall 2007)
