Finding a Project

Public Improvements Advisory Committee Search Form

Please choose your search method.

PIAC Number
 Requester Last Name
 Location
 Organization Requested

Enter your search criteria, then click the Go button.

Lists: The PIAC tracking system provides lists of all current PIAC requests, including lists sorted by:

- address
- request number
- organization

After selecting from the list, scroll through options and click on the desired option.

Search: The PIAC tracking system also allows dynamic searches by:

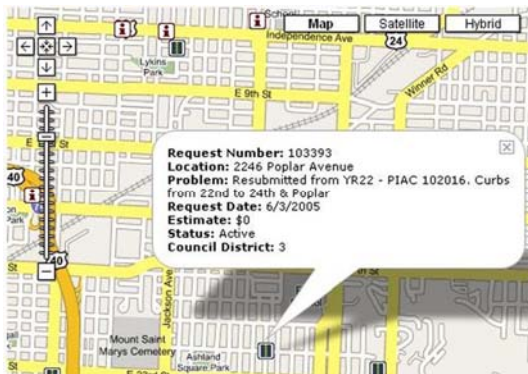

- PIAC number
- Requestor last name
- Location
- Requesting organization

Enter the relevant information and click **Go** to move to the relevant page.

Viewing Project Information

A detailed overview of the project is available, including detailed information about the nature of the problem and the project's status.

PIAC Dynamic Mapping Tool

Using our dynamic PIAC mapping tool, a user can input a request ranging from broad (All active projects) or specific (projects on 35th Street and Southwest Boulevard, projects requested by the Coleman Highlands Neighborhood Association). The results of the search will be shown on a map of Kansas City, allowing the user the ability to pinpoint projects and find up-to-date information on those projects.
